

Geochemisches Seminar ICBM SoSe2014

Dienstags 16:15-17:45 Uhr, Seminarraum W15-1-146

13.05.2014

Martha Gledhill (guest, GEOMAR, Kiel)

"Influence of iron speciation on iron biogeochemistry in the ocean"

Jim Moffett (guest, Univ. of Southern California)

"Copper-DOM-interactions in cultures of marine denitrifiers"

27.05.2014

Maren Seibt (Marine Geochemistry, ICBM)

"Molecular Geography of Dissolved Organic Matter in the Southern Ocean"

Henning Fröllje (Marine Isotope Geochemistry, ICBM)

"Neodymium Isotopic Composition of Hawaiian near-coastal waters"

10.06.2014

Tim Jesper Suhrhoff (Organic Geochemistry (ICBM) and Jacobs University, Bremen (Earth and Space Science))

"Leaching of Organic Plastic Additives under Marine Conditions"

Pamela Rossel (Marine Geochemistry, ICBM)

"DOM in porewaters of Arctic Ocean sediments"

24.06.2014

Ruifang Xie (guest, Max Planck Institute for Chemistry, Mainz)

"Cd isotope systematics along the western boundary in the South Atlantic"

08.07.2014

Sten Littmann (guest, Max Planck Institute for Microbiology, Bremen)

"NanoSIMS and SEM"

Melanie Behrens (Marine Isotope Geochemistry, ICBM)

"tba"

22.07.2014

Jeff Hawkes (Humboldt Junior Fellow, Marine Geochemistry, ICBM)

"Investigating iron speciation in high Fe environments"

(to be confirmed)

Marten Fischer (Organic Geochemistry, ICBM)

"Differenzierte qualitative und quantitative Analyse von Microplastik in Schwebstoffen und Sedimenten"
