

1. Challenge4Impact Forum

Co-Innovation in Challenge-based Learning

Are you as interested in co-innovation processes between students and companies? Do you think challenge-based learning is a suitable concept for teaching students initial skills in sustainable entrepreneurship? Moreover, would it be best to cooperate internationally?

At this online forum, we present the project results of the Erasmus+-funded Challenge4Impact project and discuss the implementation in breakout workshops with lecturers and program managers from universities and all other actors that are already active or interested in implementing student-business challenges in sustainable entrepreneurship.

26. April 2024, 09:30 – 12:30 CET, online
