

The Oldenburg Center for Sustainability Economics and Management brings together expertise and established structures within the research in the context of sustainability in economics, business administration and other social sciences.

COAST Center for Environmental and Sustainability Research

CENTOS is a member of COAST, that integrates research institutions in different aspects of sustainability at the University of Oldenburg

Mission

CENTOS connects the Center's existing research and teaching into strong networks and partnerships. This will improve chances for generating funds, increase visibility and make true inter- and transdisciplinary work possible.
